## **LIGHTS OUT! INTERNATIONAL SCI-FI COMEDY HIT MOBY ALPHA LANDS IN NYC**

NEW YORK CITY - Wowing crowds from L.A. to Edmonton to Edinburgh, *Moby Alpha* pays preposterous homage to classic sci-fi and bombastic literature, with nods to *Alien*, *Star Trek*, *2001: A Space Odyssey*, and myriad others. *Moby Alpha* tells the story of a mad captain's quest for revenge on the amorphous energy cloud that temporarily took his leg. More simply, *Moby Alpha* is *Moby-Dick* in space - but funny. The show is performed in an entirely dark theater, with the only light emanating from the duo's custom-built, million-color, LED space helmets - creating a unique, otherworldly aesthetic. No flashlights necessary. *Moby Alpha* is a space-age, comic romp unlike anything you've seen on land, the high seas, or deep space.

★★★★★ – "The writing is superb...the most creative use of lighting I've ever seen...an ingenious bit of comedy theater!" - *Edinburgh Festivals Magazine*

"The staging is so clever it nearly overheated my circuits. Simple, but practically perfect!" - *The Scotsman*
